Case Study Summary
Dynamic Healthcare
(Cerner)

Technical Training Program for Enterprise Software
& Healthcare Technology Enablement

EXECUTIVE SUMMARY

With a **Bachelor's degree in Computer Science** and a strong technical foundation, I began my career designing and delivering technical training at **Dynamic Healthcare (Cerner)** – a healthcare software company, while supporting enterprise software implementation and customer-facing radiology technology solutions.

Bridged the gap between healthcare operations and technology by supporting **Radiology Information Systems (RIS), PACS imaging** systems, and healthcare applications as an **Application Analyst** and **Technical Trainer**, enabling users to adopt complex clinical technologies.

My responsibilities spanned technical support, software testing, systems implementation, curriculum development, instructor-led training, and new employee onboarding. This experience established the foundation for my career... demonstrating how technical knowledge and learning strategy can work together to improve workforce capability, operational readiness, and organizational efficiency.

SEER FRAMEWORK

3 minute video snapshot. Throughout my career, I've combined visionary thinking with practical execution to help organizations prepare for the future. By anticipating workforce needs, leveraging emerging technologies, and designing scalable learning ecosystems, I align workforce development with business strategy.

This philosophy inspired me to create the **SEER Framework**—a business-focused methodology built on **Strategy, Execution, Enablement, and Results**. SEER transforms business objectives into workforce capability, equips employees with the knowledge and support to succeed, and measures business impact.

SEER PHASE	DETAILS		
STRATEGIC	Decide plans by defining the future. The organization required a technically proficient workforce capable of implementing, supporting, and training users on enterprise software solutions. Strategic Activities - Customer enablement planning - Learning strategy - Performance improvement - Technical onboarding strategy - Technical training strategy	Implementation – Training Business Strategy Dynamic Healthcare University Strategic Learning & Workforce Enablement Strategy Executive Summary Dynamic Healthcare's commitment to excellence is rooted in its dedication to providing the highest quality training and support to its customers. This strategy outlines the development of Dynamic Healthcare University, a centralized learning and development platform designed to enhance workforce capabilities, improve customer satisfaction, and drive business growth. This strategy outlines the development of Dynamic Healthcare University, a centralized learning and development platform designed to enhance workforce capabilities, improve customer satisfaction, and drive business growth. The strategy aligns with business objectives by integrating customer education, support, and training into the overall business strategy, ensuring a seamless and effective learning experience for all stakeholders. Business Objectives - Enhance customer adoption and implementation success. - Improve workforce capabilities across customer-facing and internal roles. - Reduce support volume through proactive education and performance support. - Streamline training across products, roles, and business units. - Create a scalable learning organization that supports long-term business growth. Strategic Pillars 1. Customer Success & Adoption Strategy Training becomes a core component of every customer implementation by providing users before, during, and after go-live to ensure a smooth transition and maximize adoption. Initiatives - Develop comprehensive implementation guides. - Provide role-based training paths before go-live. - Offer "Go-Live" support for customer organizations. - Develop customer onboarding with Technical Support to improve troubleshooting capabilities.	Implementation – Training Business Strategy Dynamic Healthcare University Strategic Learning & Workforce Enablement Strategy Executive Summary Dynamic Healthcare's commitment to excellence is rooted in its dedication to providing the highest quality training and support to its customers. This strategy outlines the development of Dynamic Healthcare University, a centralized learning and development platform designed to enhance workforce capabilities, improve customer satisfaction, and drive business growth. This strategy outlines the development of Dynamic Healthcare University, a centralized learning and development platform designed to enhance workforce capabilities, improve customer satisfaction, and drive business growth. SEER PHASE	DETAILS	
EXECUTION	Design workforce using tactics. (Knowledge, Skills, Attitude, Behavior) Designed technical learning experiences that defined the knowledge, skills, and behaviors required to configure, support, troubleshoot, test, and train users on enterprise software systems. Knowledge • Browser-based reporting • Client/server architecture • Database concepts • DICOM • Healthcare imaging systems • HL7 • Proprietary software • Report writing • SQL • System administration • Third-party software Skills • Curriculum development • Help Desk support • Remote learning facilitation • Software configuration • Software implementation • Technical instruction • Technical troubleshooting • Unit testing Attitudes • Continuous learning • Customer focus • Problem solving Behaviors • Cross-functional collaboration • Customer support • Quality validation • Technical problem solving Execution Activities • Learning architecture • Role-based learning design • Technical curriculum development • Technical workflow design • Training needs analysis	
ENABLEMENT	Develop resources to prepare people for success. (Deliverables, resources and tools) Developed instructor-led training, remote learning experiences, onboarding resources, and technical environments that enabled employees and customers to successfully learn and apply enterprise software. Deliverables, Resources & Tools • Ghost system images • Instructor-led classroom training • New employee onboarding program • Newsletters • Remote classroom instruction • Standardized training databases • Technical course materials • Technical exercises • Technical lectures
