Case Study Summary
Rotech Healthcare

Data-Driven Learning Analytics & Workforce Performance Optimization

EXECUTIVE SUMMARY

Led data-driven learning initiatives that connected workforce development with measurable business performance across a national 500+ location healthcare organization, **Rotech Healthcare**. By combining a strong analytical mindset with instructional design expertise, partnered with executive leadership, Compliance, Human Resources, Operations, and Information Technology to transform workforce data into actionable business insights.

Designed executive performance dashboards, analyzed workers' compensation trends, evaluated onboarding effectiveness, monitored Help Desk metrics, and developed performance support solutions that addressed workforce capability gaps.

These initiatives established a culture of continuous improvement by using data to guide learning strategy, optimize workforce performance, and support business decision-making.

SEER FRAMEWORK

[3 minute video snapshot](#). Throughout my career, I've combined visionary thinking with practical execution to help organizations prepare for the future. By anticipating workforce needs, leveraging emerging technologies, and designing scalable learning ecosystems, I align workforce development with business strategy.

This philosophy inspired me to create the **SEER Framework**—a business-focused methodology built on **Strategy, Execution, Enablement, and Results**. SEER transforms business objectives into workforce capability, equips employees with the knowledge and support to succeed, and measures business impact.

SEER PHASE	DETAILS
STRATEGIC	Decide plans by defining the future. Established a workforce development strategy that emphasized evidence-based decision making, continuous improvement, regulatory compliance, and performance optimization. Strategic Activities • Compliance strategy • Evaluation and metrics strategy • Learning strategy • Performance improvement strategy • Workforce development strategy • Workforce planning
EXECUTION	Design workforce using tactics. (Knowledge, Skills, Attitude, Behavior) Designed workforce capabilities that emphasized operational knowledge, data-informed decision making, compliance, leadership, customer service, and continuous performance improvement. Knowledge • Corporate compliance • Healthcare regulations • Operational workflows • Organizational processes • Proprietary applications • Safety procedures Skills • Coaching • Customer service • Data interpretation • Leadership • Problem solving • Process improvement • Technology adoption

SEER PHASE	DETAILS
	Attitudes - Accountability - Collaboration - Continuous improvement - Patient focus Behaviors - Compliance - Continuous learning - Data-informed decision making - Process consistency Execution Activities - Competency development - Learning architecture - Learning needs analysis - Orientation design - Performance analysis - Workflow analysis - Workforce analysis
ENABLEMENT	Develop resources to prepare people for success. (Deliverables, resources and tools) Developed learning resources, performance support tools, executive dashboards, and enterprise learning systems that enabled employees, managers, and executives to make informed decisions while supporting workforce capability across the employee lifecycle. Deliverables, Resources & Tools - Assessments - Bi-monthly executive metrics reports - Enterprise orientation programs - Executive performance dashboards - Interactive safety learning activities - Job aids - Just-in-time performance support - Learning modules - Orientation templates - Post-training evaluation surveys Rotech University online repository with password: HireIngrid! - Trainer coaching resources - Train-the-Trainer program - Workers' compensation trend analysis
RESULTS	Evaluate data to measure business impact. The organization established multiple data-driven feedback mechanisms that strengthened workforce development and operational decision-making. Executive dashboards provided leadership with recurring visibility into post-training sales performance, while workers' compensation trends, Help Desk analytics, post-orientation surveys, and operational feedback showed improvements to learning programs and workforce support. The implementation of Rotech University centralized learning resources for more than 5,000 employees across over 500 locations, while online job aids and performance support tools reduced reliance on memory and improved access to operational knowledge. These initiatives reinforced a culture of continuous evaluation, enabling leadership to use workforce data to guide learning priorities and performance improvement efforts.
