Workforce Enablement & Performance Gamified Support for Retail and Call Center Operations

EXECUTIVE SUMMARY

Designed and delivered innovative workforce enablement solutions that modernized onboarding, upskilling, and performance support for **Sears and Kmart retail and call center operations**. Developed engaging learning experiences using gamification, animations, self-directed learning, scenario-based activities, Train-the-Trainer resources, and manager-guided coaching to improve workforce readiness across multiple business functions.

By partnering with national training leaders and operational stakeholders, created scalable learning strategies, just-in-time decision support tools, and performance-focused resources that reduced knowledge dependency, encouraged continuous learning, and supported enterprise-wide product and service initiatives.

SEER FRAMEWORK

3 minute video snapshot. Throughout my career, I've combined visionary thinking with practical execution to help organizations prepare for the future. By anticipating workforce needs, leveraging emerging technologies, and designing scalable learning ecosystems, I align workforce development with business strategy.

This philosophy inspired me to create the **SEER Framework**—a business-focused methodology built on **Strategy, Execution, Enablement, and Results**. SEER transforms business objectives into workforce capability, equips employees with the knowledge and support to succeed, and measures business impact.

SEER PHASE	DETAILS
STRATEGIC	Decide plans by defining the future. Developed workforce strategies that emphasized employee engagement, scalable learning, performance support, and continuous capability development. Rather than relying on memorization, the strategy focused on equipping employees with practical resources, structured coaching, and just-in-time support that improved performance while supporting national business initiatives. Strategic Activities • Competency development strategy • Gap analysis • Knowledge management strategy • Learning strategy • National launch planning • Performance improvement strategy • Process improvement recommendations • Workforce capability planning • Workforce development strategy
EXECUTION	Design workforce using tactics. (Knowledge, Skills, Attitude, Behavior) Designed learning experiences that defined the knowledge, skills, attitudes, and behaviors required for retail operations, claims processing, customer service, sales coordination, and coaching. Knowledge • Claims processing • Company policies and procedures • HVAC support content • Product knowledge • Service processes Skills • Claims processing • Coaching conversations • Customer service

	- Decision making - Navigation of applications - Problem solving - Quality assurance Attitudes - Accountability - Collaboration - Confidence - Continuous learning - Customer focus Behaviors - Effective decision making - Independent learning - Manager-employee coaching - Process consistency Execution Activities - Competency development - Gamification - Learning architecture - Learning needs analysis - Manager coaching integration - Performance support design - Scenario-based learning - Workflow design	
ENABLEMENT	Develop resources to prepare people for success. (Deliverables, resources and tools) Developed engaging learning resources and performance support tools that strengthened knowledge transfer, encouraged learner participation, and simplified access to information during daily work. Deliverables, Resources & Tools - Calling Card learning game - Cartoon animations - Classroom training - Discussion guides - Electronic Participant Guide (ePG) - Final online assessment - Intranet-based learning activities - Knowledge checks - KSP ASAP decision-support tool - Learning Journal - Manager coaching guide - Sales certification animations - Scenario-based learning - Self-directed learning program - Social learning activities - Train-the-Trainer materials - Warranty claims status support tool 	3 person card game. One person pulls the card and acts as the caller; the second person acts as the associate; and the third person uses a rubric and acts as quality control – ensuring the call is compliant with the call model.   

RESULTS	Evaluate data to measure business impact. The initiative introduced scalable learning strategies that combined classroom instruction, self-directed learning, gamification, manager coaching, and just-in-time performance support to strengthen workforce capability. Decision-support tools reduced reliance on memorization by enabling employees to quickly locate claims information when needed, while manager-guided learning resources and interactive activities reinforced knowledge application and employee development.
