AH™ Framework

Creating better solutions with greater impact

SUSTAINABLE TRANSFORMATION happens when **PEOPLE** use the right processes to **CONNECT**...

AI and automation with business transformation, change management techniques, digital solutions, evaluations, facilitation and feedback, governance and human judgment

AI and automation

Exploring technologies to improve processes, eliminate friction, increase efficiency, and create new ways of working

Business transformation

Understanding the business problem, processes, workflows, roles, operating models, and desired outcomes

Change management

Helping stakeholders navigate change through engagement, readiness, communication and resistance management

Digital solutions

Identifying practical technology solutions from simple tools, app enhancements, low-code solutions that improve usability

Evaluation and analytics

Using data, feedback, and evidence to identify gaps, measure outcomes, assess effectiveness, and demonstrate business value

Facilitation and feedback

Bringing people together to create alignment, share perspectives, facilitate learning, test assumptions, gather feedback, and continuously improve new ways of working.

Governance

Ensuring innovation moves forward within the appropriate framework for risk, compliance, security, quality, and accountability

Human judgment

Challenging outputs, validating accuracy, identifying potential failures, applying context and expertise, and knowing when a human needs to make the call
